

September 20-21, 2018. Western HS Engineering classes.

1. Describe this object. All dimensions are in inches.

2. Describe this object

3. Hand draw each of the objects above on a piece of paper.

4. Draw a 3D cube with each side 2 inches long.

5. List as many types of standard **Three-dimensional objects (solid shapes)** as you can. Cubes, cylinders and cones are three examples. Look online to find more. Give a description and make a simple drawing of each.
